

REU-V2626W-AK PCB Identification information

Since the initial release of the REU-V2626W-AK there has been four PCB updates, the following will provides information on how to identify the different releases and provide a short description of the PCB releases.

PCB Version 4: Yellow Dot

This version of the PCB update supersedes all of the previous releases, it was implemented as of the 1 January 2004 production.

Enables 50° Electronic-lock function.

PCB Version 3: Green Dot

This PCB was factory fitted to appliances and as older spare part stocks were exhausted replaced the "Blue Dotted" PCB as a spare part item.

Enables 50° Electronic-lock function.

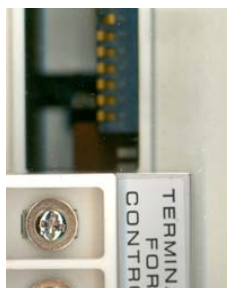

PCB Version 2: Blue Dot

This PCB was provided as a spare part item only.

Enables 50° Electronic-lock function.

These are Rinnai Japan factory set boards and **CAN NOT** be reprogrammed by TSD.

PCB Version 1: No Dot

The Initial PCB release.

DOES NOT have the 50° Electronic-lock function available.
